

August 29, 2025
Highlight/Summary Report

Statewide news:

- **No new regulations to report.**
- **Safety concern issued:** *Be aware that there were reports of a “pistachio tide” in the Patapsco River this week likely caused by a sewage spill. The greenish water caused crabs and fish to float up dead.*
- **New online licensing link:** <https://news.maryland.gov/dnr/2025/06/24/new-md-outdoors-licensing-system-now-online/>
- *The online map highlights fishing opportunities for gamefish species in reservoirs, lakes, and ponds with public access.*
- <https://dnr.maryland.gov/fisheries/pages/hotspots/index.aspx>

Rockfish:

- **Upper Bay:** Best location the *Conowingo Dam pool* using surf rods and braided lines and casting [soft plastic jigs](#) and [paddletails](#) into the turbine wash.
- **Middle Bay:** Bay Bridge and with a mix of striped bass and bluefish can be found along some of the steeper channel edges near the Brick House Bar, the Gum Thickets, Stone Rock, and Breezy Point.

White Perch and Spots:

- **Upper Bay: White perch** on the Curtis Creek and near Fort Carroll on the Patapsco River, and the waters around *Six Foot Knoll, Seven Foot Knoll, and Belvedere Shoal*.
- **Middle Bay: White Perch** off boats while fishing around the bridge pilings in 15 to 20 feet of water. **Spots** are being found off *Sandy Point State Park and the mouth of the Magothy River*.

Blue Catfish:

- **Upper Bay:** The mouth of the *Susquehanna, Elk River and Conowingo Dam pool*.
- **Middle Bay:** Sandy Point and the Bay Bridge drifting with live spot or soft crab/peelers baits down current to the bases of the piers at the 15 to 30-foot edge on the eastern side of the bridge.

Fresh Water:

- Largemouth Bass has picked up throughout the state; central, southern, and eastern reservoirs, tidal waters, and ponds offer plenty of local fishing fun for anglers no matter what they're fishing.

Stoney Creek Fishing and Hunting Club

meeting Fishing Report

Statewide news:

- No new regulations to report.
- New online licensing link: <https://news.maryland.gov/dnr/2025/06/24/new-md-outdoors-licensing-system-now-online/>
- *The online map highlights fishing opportunities for gamefish species in reservoirs, lakes, and ponds with public access.*
 - <https://dnr.maryland.gov/fisheries/pages/hotspots/index.aspx>

Forecast Summary:

- Main Bay surface water temperatures are currently in the upper 70s but will be warming. River temperatures were slightly cooler in the lower 70s.
- *Detailed & up-to-date fishing conditions in your area, refer to checking out Eyes on the Bay's*
 - <https://eyesonthebay.dnr.maryland.gov/eyesonthebay/clickbeforecast.cfm>

Upper Chesapeake Bay

Rock Fish:

- **Safety concern issued:** *Be aware that there were reports of a “pistachio tide” in the Patapsco River this week likely caused by a sewage spill. The greenish water caused crabs and fish to float up dead.*
- *Patapsco bite has cooled off, especially in the early mornings. But there have been reports of good fishing the Patapsco in the evening hours and during last weekend's flood tides.*
- Anglers using surf rods and braided lines are enjoying good fishing for striped bass at the *Conowingo Dam pool* by casting [soft plastic jigs](#) and [paddletails](#) into the turbine wash.
- Fishing for striped bass along the edges of the *Susquehanna Flats* during the early morning and late evening has improved slightly due to cooler water temperatures.

Note: Striped bass fishing resumes Aug. 1 through Dec. 10 with a slot size of 19-24 inches and a limit of one fish per day per angler.

- Recommend Anglers view an interactive [Striped Bass Regulation Map](#) on the Maryland DNR website to see when and where closures take place.
- *Attached 2025 Striped Bass/Rockfish regulations and current DNR Map.*

- *Once the season opens, anglers will be allowed to keep one fish per person per day with a slot limit of 19" to 24".*

White Perch and Spots:

- **White Perch** hot spots from the mouth of the *Patapsco* down to the *Bay Bridge*, have been holding decent numbers of perch along with a lot of [spot](#) and [croaker](#).
 - Good white perch fishing this week at Curtis Creek and near Fort Carroll in the Patapsco River.
 - Other good locations have been oyster bars and shoals in the Upper Bay this summer.
 - Anglers fishing the waters around *Six Foot Knoll*, *Seven Foot Knoll*, and *Belvedere Shoal* are catching them using bottom rigs tipped with bloodworms and Fishbites.
 - Also, fishing with grass shrimp or peeler crab near docks and piers or casting small [spinnerbaits](#) along promising looking underwater structures along shorelines during the morning and evening hours are excellent ways to fish for white perch.
- **Spots** are being found off *Sandy Point State Park* and the mouth of the *Magothy River*.
 - Upper Bay hotspots have included *Sandy Point*, the mouth of the *Magothy*, and the mouth of the *Chester River*. Peeler crab has been an excellent bait, but small [spinnerbaits](#) and spin-jigs have also been effective.

Blue Catfish:

- The mouth of the *Susquehanna*, *Elk River* and *Conowingo Dam pool* are excellent places to fish and the blue catfish can also be found to some degree in all the region's tidal rivers.
 - Various cut baits, chicken pieces and especially scented baits work very well on [fish finder rigs](#) and [circle hooks](#).

Snake Head/Chesapeake Channa:

- Located in the grass beds of the *Susquehanna Flats*, *Bush River*, *Gunpowder River* and *Upper Bay Tidal Rivers* are very popular fisheries.
 - While fishing thick vegetation and marsh shorelines, topwater frogs are excellent lure choices.
 - Most anglers are having good luck casting [topwater](#) lures during the early morning and late evening hours and [wacky rigged](#) plastics through the grass mats during the day.

Middle Chesapeake Bay

Rock Fish:

- **Eastern Bay:** Most of the hot spots are around Poplar Island, the lower Choptank River, and the Dorchester County shorelines casting [poppers](#) and [paddletails](#).
- **Bay Bridge:**
 - Drifting with live spot or soft crab/peelers baits down current to the bases of the piers at the 15 to 30-foot edge on the eastern side of the bridge is reported to give the best results.
 - Casting soft plastic jigs at the pier bases during the early morning hours is always a fun way to fish the bridge piers.

Attached 2025 Striped Bass/Rockfish regulations

- **Once the season opens, anglers will be allowed to keep one fish per person per day with a slot limit of 19" to 24".**

Bluefish:

- The mouth of the Susquehanna and Elk rivers offer some of the best fishing and the Chesapeake Beach area and Breezy Point are good places to fish too.
 - Most of the bluefish are being caught by trolling red or green surgical tubes and Drone spoons behind inline weights.
 - At times lucky anglers are encountering breaking fish and enjoying fun casting action with metal [jigs](#).

White Perch:

- White perch now be found residing in their typical summer habitats which usually means some type of structure.
 - Docks and piers fit the bill for this type of structure, and the white perch can be found under the docks or close by. In deeper waters oyster bars can be a good place to fish.
 - When fishing off docks, a simple bottom rig with a number 2 or 4 hooks, a one-ounce sinker and grass shrimp or pieces of bloodworm for bait.
 - White perch are being found in the lower sections of the region's tidal rivers near docks, piers, submerged rocks, and similar structure.
 - Grass shrimp and peeler crab make good bait. Casting small [spinnerbaits](#) and [spin jigs](#) during the morning and evening hours along promising shorelines is a fun option.

- **Blue Catfish:**
- Bite is still on from Sandy Point all the way down to Solomons.
 - Best fishing on the Choptank River from the town of Choptank to Denton.

Crabs:

- Recreational crabbers are doing well in most regions of the Bay this week.
 - In the upper Bay tidal rivers such as the Gunpowder and Chester, most crabbers can catch a half bushel or more of large and heavy crabs.
 - *Many are doing better with rings and collapsible traps. The best crabs tend to come from waters 6-12 feet deep.*
 - The catches increase per trip in the middle and lower Bay regions. Surface water temperatures are in the mid to upper 80s in most areas and crabs are falling off trotlines at the surface.
 - Blue crabs are reported to have moved far up some of the tidal rivers. In the Choptank, they can be found as far as the confluence of the Tuckahoe.

Fresh water

- **Good fishing locator:** DNR has introduced a monitoring database on your favorite freshwater fish species at your preferred fishing spots.
 - A new impoundment mapping tool is available on the [Freshwater Fisheries Fishing Lakes and Ponds webpage](#).
 - *The online map highlights fishing opportunities for gamefish species in reservoirs, lakes, and ponds with public access.*
 - <https://dnr.maryland.gov/fisheries/pages/hotspots/index.aspx>

Largemouth Bass:

- Largemouth bass are usually a summer focus for anglers and bass anglers are enjoying good fishing in the Susquehanna Flats.
 - The tidal Potomac and reservoirs and small ponds throughout the Maryland landscape also offer good fishing for largemouth bass.
 - Largemouth bass are holding to a typical summer mode of activity, feeding in the shallows at night and seeking cool shade during the heat of the day.

Crappie:

- Crappie are wrapping up their spawning activity and have begun spreading out to deeper structure such as stump fields, docks, bridge pilings, and shorelines with steep rip-rap.

BAITs – Gear - Times

Rock Fish:

- *Jerkbait*s fished along the rocks and Jigging three-to-five-inch soft plastics and straight tails are working well.
- *Jigging three to five inch White and Chartreuse tandems soft plastics are working well.*
- [Live lining spot](#) or [trolling](#) are good.

White Perch:

- Fishing grass shrimp and pieces of bloodworm on a simple bottom rig fished close to a dock, or casting small spinners and soft plastic baits *during the early morning and evening hours along shorelines.*
 - When fishing off docks, a simple bottom rig with a number 2 or 4 hooks, a one-ounce sinker and grass shrimp or pieces of bloodworm for bait.
- Peeler crab has been an excellent bait, but small [spinnerbaits](#) and spin-jigs have also been effective.

Blue Catfish:

- A variety of cut baits work well; white perch, gizzard shad, menhaden, and American eel are excellent baits, but chicken parts and scented baits also work well. *A fish finder rig or sliding sinker rig with a small float in front of a 5/0 to 7/0 circle hook is the most popular rig for fishing blue catfish.*

Snakeheads:

- Casting white paddletails and chatterbaits near emerging grass and shoreline submerged brush is a good tactic. *Often the sunny side of creeks during the afternoon hours is a good place to target fish seeking slightly warmer waters.*

Walleye:

- Casting a mix of swimbaits, flukes and small crankbaits with good results.

Largemouth Bass:

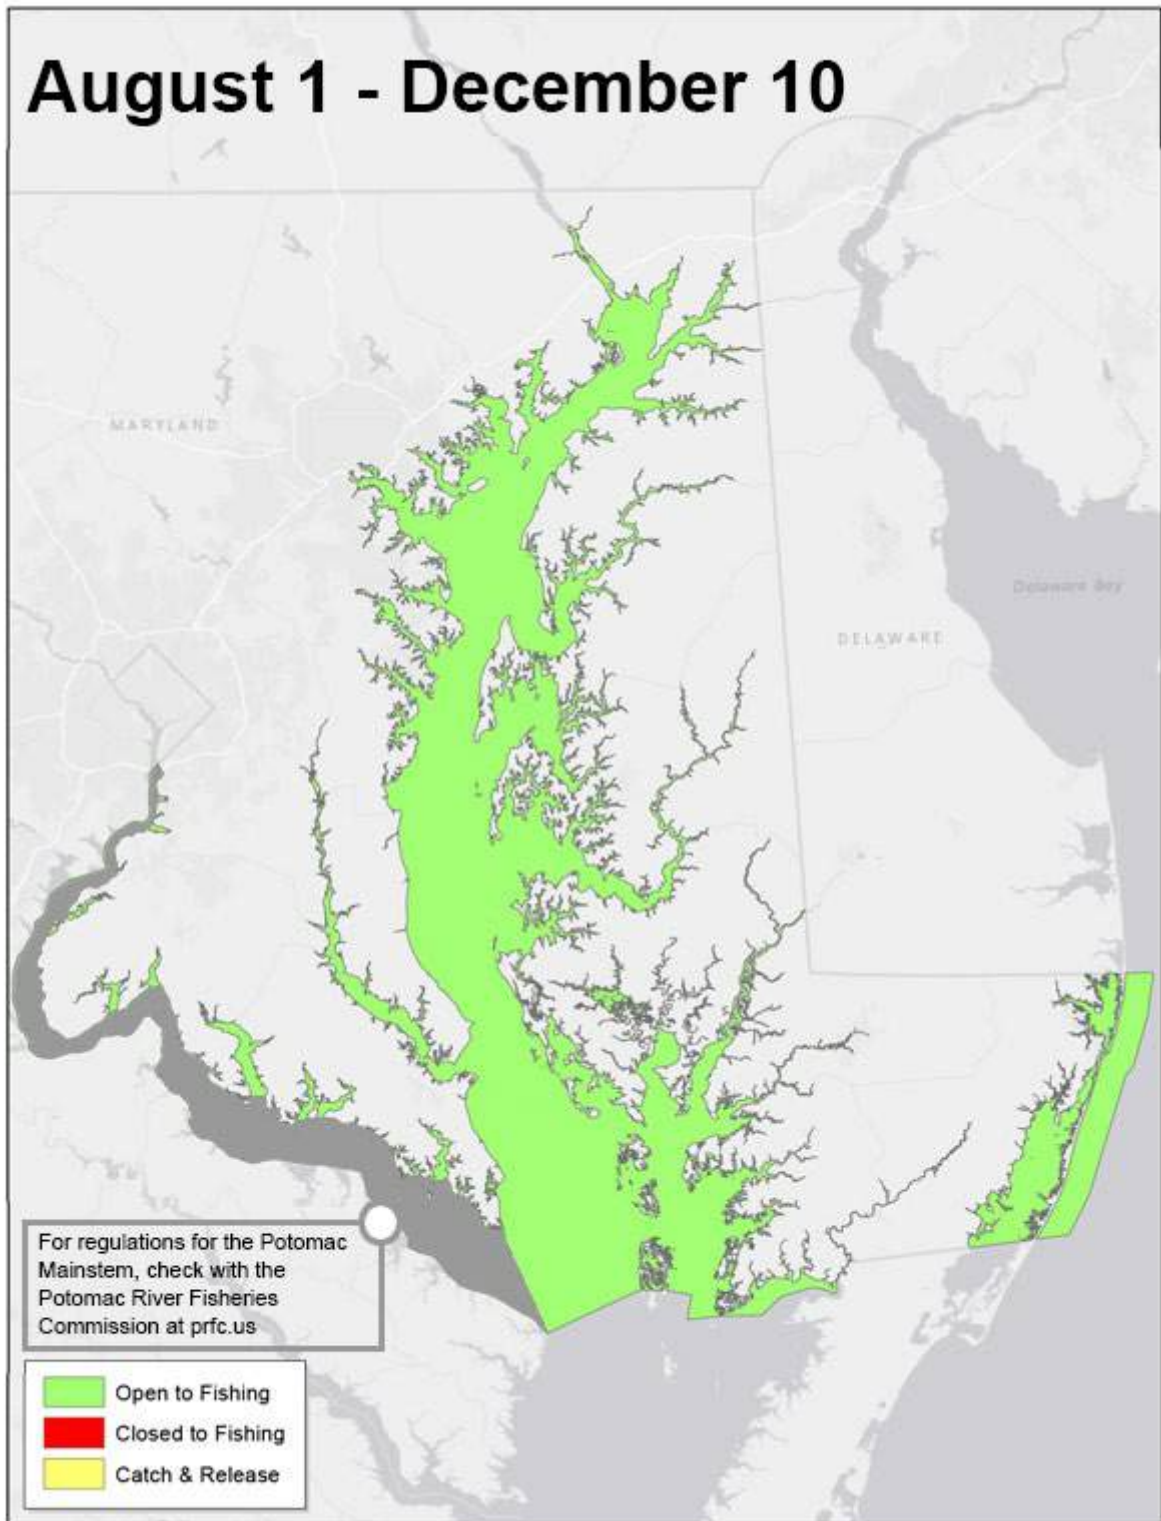

- A mix of spinnerbaits, lipless crankbaits, swimbaits, flukes, and jerkbaits are all good choices to use.

Crappie:

- Rigging small minnows or marabou jigs under a slip bobber and fishing close to structure.

DNR Striped Bass 2025 Regulations

Step 8 - Go fishing and catch fish!

Putting it all together

The whole purpose of this process is to help you find the best places to fish.

1. First learn about where your fish live and preferred conditions.
2. Next, pull out your Chesapeake Bay charts and a marker.
3. Now visit your regional websites with current oxygen, salinity, temperature and water clarity conditions.
4. As you move through each step, continue to cross off unsuitable areas on your chart.
5. Now in the remaining areas on your chart, begin highlighting prime habitat.
6. At this point, find moving water by checking your tide charts, wind conditions and flow at these prime areas.

You have now identified the best places to find fish right now, not last week or last month, but **right now**.

The last step, and most fun, is to go fishing and catch a bunch of fish!

And when you do, don't forget to take photos and submit them to the Angler's Log!
